November 7, 2017 Version 3.2.7 Some effects, though, really great app! There are lots of really fun effects to choose from. Some effects, though, change so quickly and can't be slowed down (at least I haven't found a way). IT'S REALLY DIFFICULT TO CREATIVELY TAKE ADVANTAGE OF EFFECTS THAT CHANGE REALLY QUICKLY. It's hard to get the photo you want! I love MegaPhoto, but the problem I just mentioned is losing a star for me. SLOW DOWN THE CHANGES, PLEASE! Some effects let you control changes by tapping the screen. You are usable. Style still, thanks for being a really FUN APP! I've always loved this app. Whenever I was small (around the age of 6) my aunt had an app similar to this on her iPad and I loved that I went home later that day looking for this particular app, but then I found this app and this one is 10x better than anything I've used. Needless to say, I have loved this game for almost 7 years. It's a great game for al ages with a great range of filters, whether you feel goofy, playful, or just cute this game is definitely for you! A really useful video editing app with interesting effects. I really use core 6 for different things. You are able to layer effects, but you can't edit sounds/add soundtracks, but you can easily save them to camera roll and use another app. 4 stars because I wish I had more useful effects/options or more effects were available for use. The developer will need to provide privacy details when submitting the next app update. Developer Website App Support by Ed Marrero on 2021/01/24 16:19 I like it better when exported to PNG.
